CRWA Solid Waste Management System

Dear Members,

This is to inform all residents that Bhubaneswar Municipality Corporation (BMC) is going to implement solid waste management system for all the Residential societies' complexes in the city. In this regard, BMC had held a meeting on 21/11/19 & invited the Presidents/Secretaries of all Residential Welfare Associations (RWA) to explain the norms and procedures which are required to be implemented in a few weeks from now.

As advised by CRWA President, the undersigned had attended the aforesaid meeting last week organized by BMC. The following was conveyed to us during the meeting:

"All the residential welfare associations shall process, treat and dispose the bio-degradable wastes within the premises through Aerobic composting or anaerobic digestion or bio-methanation technology as per Rule 4(6), (7), (8) of SWM Rules, 2016."

In line with the above, BMC has also explained the Standard Operating Procedure (SOP) for all RWAs to follow. We have also been informed that this system shall be implemented from 1st January 2020. As a responsible society we are duty bound to Implement solid waste management system and set an example for others. Moreover, if we don't follow the instruction of BMC, our complex will turn into a heap of garbage.

The task in front of us is immense and requires whole hearted participation from all concerned. It is required to quickly form a dedicated team who will spearhead this activity in our society for which we look forward for voluntary participation in large numbers including our esteemed lady members. The volunteers may please furnish their names to the undersigned for formation of the waste management committee.

Thanking You,

kl-ly
24/11/2019
Pramod Kumar Padhy

General Secretary, CRWA
