Ref. No. 192/2019-20

Date : 18/5/20

NOTICE

As you are aware that Cyclone AMPHAN is knocking at the door for which adequate preparation as well as support from all residents of Cosmopolis society is required. While we are taking all possible measures, we request all the residents to take precautions in their individual capacity for their respective flats. It is also essential that we use electricity and water during this cyclone period carefully. In this respect the following minimum guidelines are to be adhered to:

- 1) In case of power cut, we will operate DG set to supply power. However, usage of Air-conditioners, washing machines, heating appliances are strictly prohibited during power supply through DG. In case, we observe the violation in this respect a fine of Rs5000/- for the concerned flat will be imposed. If the power consumption situation still does not improve, DG supply to the entire tower will be disconnected till the normal power supply is restored to safeguard the DG overloading.
- 2) As regards water supply, all precautions are being taken. However, depending on the water supply situation from WATCO, we may be constrained to limit the water supply for few hours in the day. If any such situation arises, we will inform such restrictions. All residents are requested not to use washing machines and make optimum use of water during restricted supply. Also please store some quantity of water to meet any such exigency.
- 3) It is also important that all residents must take care of their glass doors and windows inside the house during the cyclone as well as remove any objects including flower pots etc. from their respective balconies.

We had a "Cyclone AMPHAN" preparatory meeting yesterday where 16 residents participated excluding EB members. Different committees are formed to handle the situation smoothly. Please contact the group leaders of respective committee in case of any help/requirements during the above period.

We request cooperation and support from all. Wish everybody to stay safe.
